

Initial Build Notes

Designer: Lizette Arroyo

Creative Director: Ellie Kosowsky

As this was the initial-build, Lizette did not fully style the website so there are a couple main things she was planning on changing for the final site

Discussion Notes:

- **HomePage:** One main thing we spoke about was making the paintings on the homepage in a more similar format to the mock-up
- **HomePage:** Another thing we spoke about was changing the hover technique that is currently on the paintings on the homepage
 - Lizette plans on the hover being more gray or trying a shadow (as opposed to the current technique of opacity)
 - As well as adding the words so that it is clear where each painting respectively navigates
 - The nav bar would be deleted from the bottom of the home page
- **HomePage:** Fixing the code so that when clicking the home page from interior pages it reloads the same page as opposed to opening a new webpage
- **Interior Pages:** Adding more breathing room for the Pollock Icon → making it more obvious that it is clickable and will take you to the home page
- **Gallery Page:** Replacing the inspiration page with a gallery page that showcases Pollock's work (designed similarly to the pictures on the home page)
